 Installation must comply with local and national electrical codes. A qualified, licensed electrician should install your LED driver for safety and proper installation.

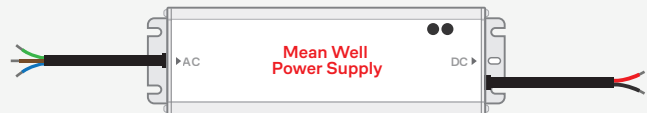

Mean Well LED drivers are intended to be directly hardwired. However, a plug can be purchased at any home improvement store such as Lowe's, Home Depot, Ace etc. and attached to the input of the driver.

LPV SERIES

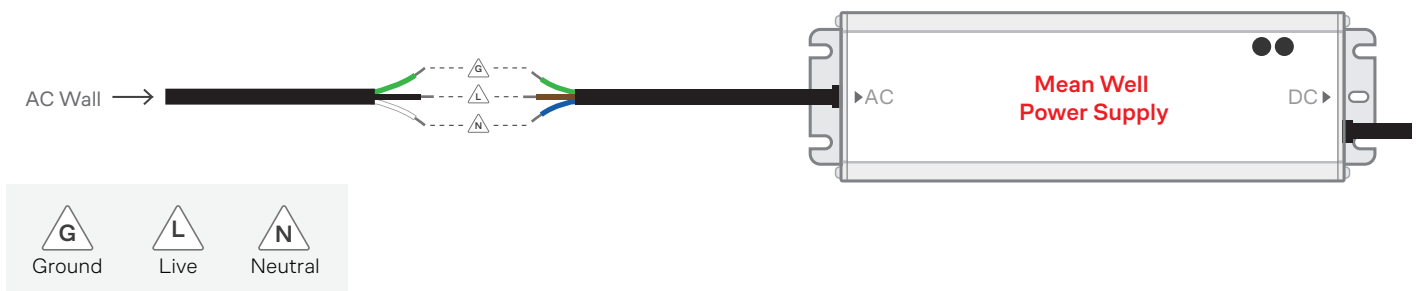

Uses 2 prong plug

HLG SERIES

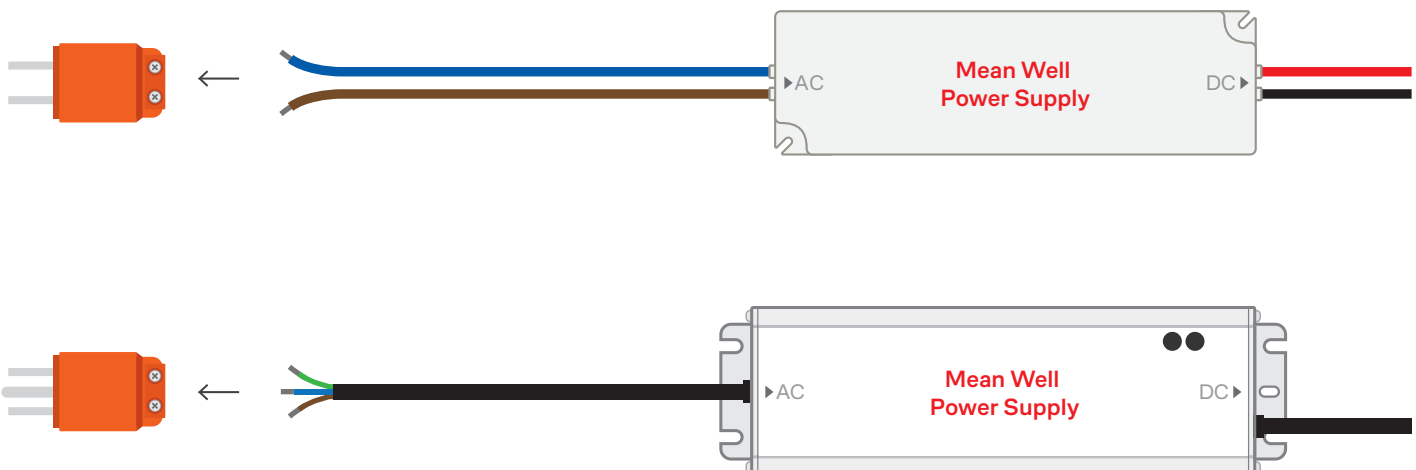

Uses 3 prong plug

1. Hardwire to AC Power Line

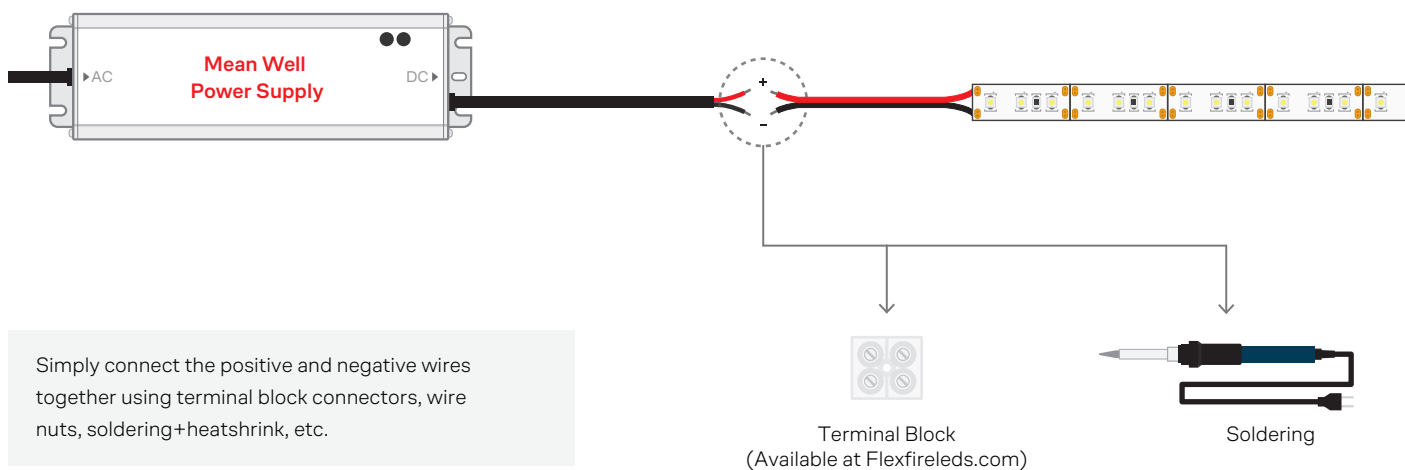

2. Add an AC Plug (Sold at any home improvement or hardware store)

DC Installations Options

1. Connecting the LED driver to an LED strip light

2. Connecting the LED driver to an LED dimmer or controller (receiver)
