

# UltraBright<sup>™</sup> Accent Dynamic Tunable White LED Strip Light

Product Data Sheet

Please read all instructions carefully before installation.

#### Description

Our UltraBright<sup>™</sup> Accent Dynamic Tunable White Series is the perfect choice for those who seek the full potential of white tunable lighting. Choose from countless color temperatures between a wide range from 2700K to 6200K and enjoy full dimming capabilities to switch ambiances within seconds. With near-perfect color rendering and a very long run length, these sophisticated lights are made to satisfy the desire for beauty and functionality. These refined tunable strips are also perfect for human-centric lighting, which will help realign your circadian rhythm. Transform your most treasured spaces into safe havens by adjusting color temperatures to fit your schedule or to match your mood. Whether you want to revitalize bedrooms, beautify businesses, or get deeper sleep, the Accent Dynamic Series is made to improve every corner of your life.

15-Year Warranty

#### **Product Features**

| CCT                      | 2700K-6200K                   |
|--------------------------|-------------------------------|
| CRI                      | High CRI of 95                |
| Voltage                  | 24V DC Input                  |
| Brightness               | Up to 277 lm/ft (909 lm/m)    |
| Efficacy                 | Up to 81 lm/W                 |
| LEDs/ft                  | 73 LEDs/ft (240 LEDs/m)       |
| Beam Angle               | 120° Beam Angle               |
| Ambient Temperature      | -4°F to 104°F (-20°C to 40°C) |
| LED Pitch                | 3/16" (5 mm)                  |
| Strip Width              | 3/8" (10 mm)                  |
| Cutting Points           | 2" (50 mm)                    |
| PCB                      | 4 oz copper                   |
| Max Run Length in Series | 49 ft (15 m)                  |
| LED Size                 | 2216                          |
| Adhesive Type            | 3M VHB 4930 Tape (IP20)       |
| Dimmable                 | Yes                           |

| GRIP-SC-C3-10-0*                       | Attaches two sections of LED strip together in a continuous run.                                    | -          |                     |         |

#### Strip Light Connectors

\*Calculate max length of LED strip to follow the solderless connector based on an amperage draw of 0.15 A/ft (0.48 A/m) at 24 volts. \*\*Be sure no more than 5 amps is drawn after any solderless connector.

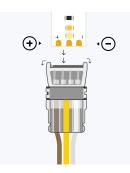

#### **Solderless Connection Guide**

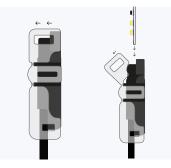

When installing connectors with certain LED Tape Lights such as our Dynamic Tunable White, or Sienna Dim-to-Warm, you will need additional copper pad to work with. You need to cut both solder pads so that the piece to be attached to the connector has more surface area to insert into the connector head.

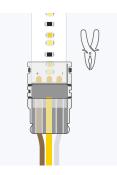

1. Remove 1/4" of 3M adhesive tape on the back from the end of the strip that you want to connect. It must be removed to allow it to fit properly with the solderless connector.

2. Double check the polarity of the strip to match the positive (+) markings together and negative (-) markings together. If you accidentally close the connector before you're ready, you can use a small flathead screwdriver to pry the top back open.

3. Open the top of the grip connector and insert the LED strip inside. Make sure the LED strip is facing up towards the translucent top and the solder pads are directly above the small hooks on the connector.

4. Once everything is in order, use pliers to close and lock the connector. You'll hear a "click" sound when it is properly closed.

### **Compatible Aluminum Extrusions**

## Safety And Disclosures

1. Installation must be in accordance with local and national electrical code regulations.

2. To ensure safety and correct installation, our strips are intended to be installed by a qualified, licensed electrician.

3. Only install with a Class 2 DC Constant Voltage LED driver to meet UL requirements.

4. Do not install in environment where excessive heat may exist. We encourage the use of a heat sink for heat dissipation purposes when using the UltraBrightTM Slim Series LED Strip Light.

5. LED strip lights must be handled with care. Excessive handling, bending, and pressure may damage the product, voiding the warranty.

6. Do not install indoor LED tape light products in outdoor / wet location environments. Only use copper wiring. Use wires rated for at least 176°F (80°C) and certified for use with external connection of electrical equipment.

7. Each maximum run requires a dedicated power feed from the driver. Do not extend beyond the recommended maximum run length.

8. Make sure the appropriate gauge wire is installed between LED driver, LEDs, and any dimmers. When choosing wire, calculate voltage drop, maximum amperage rating, and the location ratings on the wire. Improper wire selection and installation could overheat wires, and cause fire.

9. Do not modify product beyond instructions or warranty will be void.

10. We reserve the right to modify and improve the design of our fixtures without prior notice. Although we try our best to order the same colors every time, due to changes in technology and phosphors over time, we cannot guarantee to match existing installed fixtures for subsequent orders or replacements in regards to product appearance, CCT, or lumen output.

#### Warranty Information

#### **Limited Warranty**

This product has a 15 year limited warranty from the date of shipment. This warranty only includes the main product outlined in this specification sheet and does not include the additional accessories that are used as a reference. Complete warranty details for fixtures and additional accessories are available at https://www.flexfireleds.com/warranties/ within the Policies section. For warranty related questions please contact the product support team at (support@flexfireleds.com).

#### **Consumer's Acknowledgment**

Flexfire LEDs, Inc. stands behind its products when they are used properly and according to our specifications. When you purchase our products, you are agreeing to the terms and conditions outlined in our warranty section. We try our best to make recommendations, but the burden of proper installation, design, and maintenance relies on the purchaser. This limited warranty does not include product failures that are the result of: Not using a voltage regulated power supply to connect the LED product or controls; Connecting LED products to the wrong output voltage; Improper connection of power supplies, LED products, or controls; Connecting LED products or controls directly to any AC power source if they are stated for DC only input; Connecting power supplies backwards to an AC power source; Products used in an inappropriate location or in environmental conditions (temperature, humidity, moisture, etc.) outside the normal specified range; Water damage to products not specifically sold as waterproof products; Electrical power surges and spikes; Damage from hail, flooding, tornado, fire, wind, earthquake, lightning, electrical storm, or any other natural disasters or "force majeure" incidences; Damage caused by a vehicle or other accident; Damage caused when transporting the item; Damage to any products that were modified by the user, used for purposes other than as intended or directed, or connected to LED systems or components not purchased from Flexfire LEDs; Products that have been subjected to misuse, mishandling, misapplication or accident. Products used in connection with any components, devices or systems other than those explicitly approved as compatible with Company's products and listed on Company's website. Excessive wear and tear and/or physical or accidental abuse, loss, or theft. Improper repairs or warranty services performed by someone other than Flexfire LEDs will void this warranty.
